DUANE RASMUSSEN
1375 W 500 N #102
PROVO UT 84601

Dear Mr. Rasmussen:

On July 11, 1995, a field compliance inspection was conducted at the site referenced by your mining notice, UTU-070671 (formerly UT-055-91-21N). This notice was accepted by our office on August 7, 1991, under the 43 CFR 3809 regulations for surface management.

No recent mining related activity was observed on Hammer Head #1-#2 (UMC 286577-8), located in NE¼, Section 3, T. 22 S., R. 10 W. and SW¼, Section 35, T. 21 S., R. 9 W., SLBM. Furthermore, our records indicate these claims were closed on February 20, 1992.

If you are still actively operating under your notice, you must update your activity with this office immediately.

If your activity has been suspended indefinitely, the disturbed areas must be reclaimed. 43 CFR § 3809.1-3(d), requires reclamation at the earliest feasible time. Reclamation includes cleaning up all litter and debris over the area of operations. The trailer on Hammer Head #2 must be removed. Excavations on Hammer Head #1 need to be filled in and reshaped to approximate natural contour. Finally, stockpiled topsoil should be evenly distributed over the disturbed areas and seeded with pure live, certified weed free seed. Seed tags must be available if requested by the Authorized Officer. The following seed mixture is recommended:

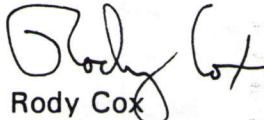

Common Name	Scientific Name	(lbs/acre)
Hycrest crested wheatgrass	<u>Agropyron desertorum</u>	3
Pubescent wheatgrass	<u>Agropyron trichophorum</u>	2
Russian wildrye	<u>Elymus junceus</u>	2
Ladak alfalfa	<u>Medicago sativa</u>	1
Forage kochia	<u>Kochia prostrata</u>	½
Yellow sweetclover	<u>Melilotus officinales</u>	½

The above rate is for drilling. If it is not possible to drill the seed, it may be broadcast. If the seed is broadcast, the application rate should be doubled. After broadcasting, the land should be lightly harrowed to bed the seeds.

An operator and/or claimant who fails to comply with the Federal regulations contained in 43 CFR 3809, will be issued a Notice of Noncompliance, followed by appropriate remedial action.

If you have any questions regarding this matter, please contact Rody Cox at (801) 743-6811.

Sincerely,

Rody Cox
Geologist
